

# TRANSMISSION OIL

## Higher performance means higher demands

Today's gearboxes and transmissions are designed to perform at higher levels than ever before. This in turn demands that high quality and increasingly complex gear lubricants must be used. Valvoline gear oils have been developed following many years of research, development, and field experience. The result is a range of oils that are designed to meet the extreme performance demands of today's gearboxes and transmissions.

# DURABLEND® GEAR OIL

DuraBlend gear oils are specifically designed to provide boosted protection and high performance, at both high and low temperatures. DuraBlend oils are formulated with a unique blend of synthetic and premium base oils with an advanced additive system to provide superior extreme pressure benefits and extra durability for tough driving conditions. Recommended for cars, trucks and buses.

## DuraBlend Gear Oil GL-5 LS 75W-90

- > For use in all limited slip, hypoid and other gears where API GL-5 type lubricant is specified
- > Special additives reduces noise in differentials
- > Protects against wear under all conditions

## DuraBlend Gear Oil GL-5 75W-90

- > For use in all hypoid transmissions and transaxles where API GL-5 gear oil is specified
- > Provides excellent protection under all weather conditions
- > Protects against rust and corrosion

## DuraBlend Gear Oil GL-4 75W-90

- > For use in all transmissions and transaxles where API GL-4 gear oil is specified
- > Provides enhanced protection and lubrication for smooth running gear operation
- > Protects against rust and corrosion
